Cineroid EVF4 RVW

with Retina display

Thank you for purchasing the Cineroid EVF.

The Cineroid EVF (hereafter referred to as "EVF") is a view finder that can be mounted on any video camera with a HDMI output signal. Please thoroughly read the user manual for best operation and understanding of all of the functions of the EVF.

| Test Before Operating

It is recommended to test the EVF before operating. Check if the EVF can be turned on once powered, and check if the information/menu is being properly displayed on the LCD.

| Copyrights and Prohibitions

The use of images of people, property, and places can without permission can be prohibited by law. Please refer to your region's laws regarding copyrights.

- Canon and EOS are registered trademarks of Canon.
- Nikon is a registered trademark of Nikon.
- Sony is a registered trademark of Sony.
- Panasonic is a registered trademark of Panasonic.

| Safety Precautions

1. Do not face the eyecup directly into the sun as it may damage the LCD.
2. The shadow disk is installed on EVF at factory. This shadow disk can be removed by disassembling eyecup from loupe.

Safety Precautions

Please observe the following safety precautions as they are meant for the safe and proper use of the product to reduce the risk of accidents. Upon reading the user manual, keep it in a safe and available place.

- ⦿ Do not use any batteries, power cord, or accessories that are not specified in this document.
- ⦿ When using a power cord, be sure to plug it in completely. Do not handle power plugs when your hands are wet. When unplugging the power cord, grasp the plug body or adapter instead of the cord.
- ⦿ Power cords that are scratched, heavily bent or twisted can potentially be hazardous and a source of electric shock and/or fire.
- ⦿ Do not insert foreign objects into the product's electric or cable components.
- ⦿ Do not place the power cord near sources of heat as this may melt or cause damage to the cord potentially causing fire or electric shock.
- ⦿ Do not disassemble or modify the product. This may damage the product and cause danger due to a malfunction.
- ⦿ Please keep the product out of reach of young children. Injuries may occur due to damage to the product.
- ⦿ When using the product in an airplane or hospital setting, it is recommended to acquire authorization first as signals or electro-magnetic waves from the product may cause other equipment to malfunction.
- ⦿ Do not store the product in a dusty or humid environment as damage may occur.
- ⦿ When the product is mounted on a camera, do not lift or move the camera by grabbing the product. This may cause damage to the product or the camera mount.
- ⦿ Do not clean the product with paint thinner, benzene, or other volatile solvents. This may cause damage to the product and become a fire hazard.
- ⦿ This product is not waterproof. If the product is dropped in water, contact the service center immediately.

Parts

Before Using the EVF

Openable Optical Loupe

The optical loupe attached to the EVF body can be flipped open 180 degrees.

Hood for Loupe

The opened Optical Loupe

You can use the LCD hood in the open state by using separated part from the optical loupe which was attached to the cineroid EVF4RVW.

Before Using the EVF

Separate of Loupe

Please operate both side of latches on the optical loupe and remove the optical loupe. The optical loupe attached to the EVF body can be detached completely.

Adjusting the Diopter / Connecting Extension tube

1 Touch Removealbe

When viewing through the optical loupe, the user can adjust the diopter accordingly. Rotate the dial in either direction until the image becomes clear. and Extension tube is used to extend loupe length for old eye.

Before Using the EVF

Installing the Battery

1. Open the battery pin cover

2. Attach the battery mount

The Cineroid EVF4RVW uses Canon, Nikon and Panasonic's some types of batteries. Each type of battery can be used with battery mount base and battery holder. The battery or the connectors may be damaged if not aligned properly.

Battery Mount

Battery holder

Battery

Connecting External Power

DC in 6~17V

Proper voltage for external power is 6-17V.
Attention to the connecting polarities and voltage, otherwise the connectors may be damaged.
When both external power and battery is connected, battery is not consumed.

PA04 (D-tap to mini XLR cable)

Before Using the EVF

Connecting input / output

2 Serial Digital Inputs the EVF4RVW module has HD-SDI switchable 3G-SDi input connectors for monitoring. Connect input then select the type of input in menu.

Menu : System - Input Select

*How to operate the menu, refer to page 12.

Select the type of Input

Power On / Off

Install the battery or connect external power and Turn the power switch to the ON position. If you have an external input, you will see the image displayed from that signal. If there is no external input, you will see the default screen.

Power ON/OFF switch

Basic Features

Operating the Menu

1. Access the setting and features by pressing the wheel button on the left side of the EVF.
2. Press the wheel button to select the main menu. When not in the menu, you can adjust the speaker volume by scroll the up and down wheel button.

3. Once the main menu is selected, scroll the up and down wheel button to navigate through the menu. The cursor is highlighted in red.
4. Move the cursor to the feature you want to select/change and press the wheel button to access that feature.
5. Scroll the up and down wheel to change the value of the feature.
6. Move the cursor to Exit and press the wheel button to return to the previous menu.
7. To exit the main menu, move the cursor to Exit or press the F1 button.

*** Tip** Press F1 button to exit Menu at any position.
